Courses planned for Sem 1 and Sem 2, based on NUS's 2026/27 courses, exams and exchange list

Year of study during the exchange: 3 · Made on 12 Nov 2026 with NUS Mod Finder

`https://nusmodfinder.rcn.sh/?sem=2&ng=1&study=ug3&pick=ST4234.2&pick=MA4251.2&pick=ST3247.2&pick=ST2137.2&pick=MA3210.1&pick=ST3131.1&pick=ST3236.1&pick=ST3248.1&alt=ST4253.1&alt=ST4248.2&ay=2026-2027&view=shortlist`

For a later year, check that year's: NUS publishes the exchange course list in March or April and updates it later (this one is dated 1 Sep 2026), and publishes the course descriptions and exam timetable in July or August (NUS Global).

Sem 1

Primary picks

MA3210 Mathematical Analysis II

Application form, Sem 1
1

Primary pick 5 · Sem 1 · 4 units · https://nusmods.com/courses/MA3210

Department, level	Mathematics, Science · Level 1000–3000, undergraduate
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 1	✓ Sem 1 · Open to exchange students
2026/27 exam	Sat 21 Nov 2026, 1:00 pm, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 0, preparation 6 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN ((must have completed 1 of MA2101/MA2101S at a grade of at least D) AND (must have completed 1 of MA2108/MA2108S at a grade of at least D))
Preclusion	None listed

COURSE DESCRIPTION (NUS, VIA NUSMODS)

This is a continuation of MA2108 Mathematical Analysis I. The objective of this course is to develop rigorously all the basic results in one- and multi-variable calculus. The emphasis is on logical rigour. Major topics: total and partial derivatives, Jacobian matrix, differentiable functions, chain rule, mean value theorem, l'Hopital's rule, Taylor's theorem, convergence of derivatives; Riemann and Darboux integrals, Fubini's theorem, convergence of integrals, improper integral of functions, fundamental theorem of calculus, integration by parts, differentiation under integral sign, change of variable formula.

ST3131 Regression Analysis

Application form, Sem 1
2

Primary pick 6 · Sem 1 · 4 units · https://nusmods.com/courses/ST3131

Department, level	Statistics and Data Science, Science · Level 1000–3000, undergraduate
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 1	✓ Sem 1 · Open to exchange students
2026/27 exam	Wed 25 Nov 2026, 9:00 am, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 3, preparation 3 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN (must have completed ST2334 at a grade of at least D OR must have completed ST2131 at a grade of at least D OR must have completed MA2116 at a grade of at least D OR must have completed MA2116T at a grade of at least D)
Preclusion	If undertaking an Undergraduate Degree THEN (must not have completed EC3303 at a grade of at least D)

COURSE DESCRIPTION (NUS, VIA NUSMODS)

This course focuses on data analysis using multiple regression models. Topics include simple linear regression, multiple regression, model building and regression diagnostics. One and two factor analysis of variance, analysis of covariance, linear model as special case of generalized linear model. This course is targeted at students who are interested in Statistics and are able to meet the pre-requisites.

ST3236 Stochastic Processes I

Application form, Sem 1
3

Primary pick 7 · Sem 1 · 4 units · https://nusmods.com/courses/ST3236

Department, level	Statistics and Data Science, Science · Level 1000–3000, undergraduate
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 1	✓ Sem 1 · Open to exchange students
2026/27 exam	Fri 27 Nov 2026, 9:00 am, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 3, preparation 3 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN must have completed 1 of MA1508E/MA1522/MA2001 at a grade of at least D AND must have completed 1 of MA2116/MA2116T/ST2131/ST2334 at a grade of at least D

Preclusion	If undertaking an Undergraduate Degree THEN must not have completed MA3238/MA3238S at a grade of at least D

COURSE DESCRIPTION (NUS, VIA NUSMODS)

This course introduces the concept of modelling dependence and focuses on discrete-time Markov chains. Topics include discrete-time Markov chains, examples of discrete-time Markov chains, classification of states, irreducibility, periodicity, first passage times, recurrence and transience, convergence theorems and stationary distributions. This course is targeted at students who are interested in Statistics and are able to meet the pre-requisites.

ST3248 Statistical Learning I

Application form, Sem 1
4

Primary pick 8 · Sem 1 · 4 units · https://nusmods.com/courses/ST3248

Department, level	Statistics and Data Science, Science · Level 1000–3000, undergraduate
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 1	✓ Sem 1 · Open to exchange students
2026/27 exam	Sat 28 Nov 2026, 9:00 am, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 3, preparation 3 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN (must have completed 1 of ST2132/ST2334 at a grade of at least D)
Preclusion	If undertaking an Undergraduate Degree THEN (must not have completed YSC4216 at a grade of at least D)

COURSE DESCRIPTION (NUS, VIA NUSMODS)

Statistical learning is a large collection of computer-based modelling and prediction tools with applications in diverse fields including business, medicine, astrophysics, and public policy. This series of two courses covers many of the popular approaches for a variety of statistical problems. There is heavy emphasis on the implementation of these methods on real-world data sets computationally. Part I gives a broad overview of the common problems as well as their most popular approaches. Topics include linear regression model and its extensions, classification methods, resampling methods, regularisation and model selection, principal components and clustering methods.

Backups

ST4253 Applied Time Series Analysis

Application form, Sem 1
5

Backup 1 · Sem 1 · 4 units · https://nusmods.com/courses/ST4253

Department, level	Statistics and Data Science, Science · Level 4000, Honours
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 1	✓ Sem 1 · Open to exchange students
NUS's notes	– GRO: “Higher level undergraduate courses (e.g. course code starting from 4000 & above) have very limited supply and are usually NOT available to exchange students. In order to increase the chances of securing enough courses, incoming exchange students should consider taking courses with course code starting from 1000 to 3000”.
2026/27 exam	Wed 25 Nov 2026, 5:00 pm, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 3, preparation 3 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	if undertaking an Undergraduate Degree then (must have completed 1 of ST2132/ST2334 at a grade of at least D)
Preclusion	if undertaking an Undergraduate Degree then (must not have completed "ST3233" at a grade of at least D)

COURSE DESCRIPTION (NUS, VIA NUSMODS)

This course introduces the modelling and analysis of time series data. A computer package will be used to analyse real data sets. Topics include stationary time series, ARIMA models, estimation and forecasting with ARIMA models This course is targeted at students who are interested in Statistics and are able to meet the pre-requisites.

Sem 1 totals

- Sem 1: 16 units picked, if NUS accepts you into each
- About 40 hours a week at NUS's rate (2.5 hours a week per unit)
- NUS states hours a week only; your university's own conversion decides credit
- GRO: “Each semester normally includes 13 weeks of instruction and 2 weeks of examinations”
- To be admitted, NUS must accept you into at least 12 units in a semester (NUS's brochure; GRO: “three pre-registered courses (or 12 units)”)
- In CourseReg you must keep at least 12 units or three courses (GRO)
- NUS’s brochure says at most 23 units a semester, but NUS Global’s exchange page says 20 (NUS Business School’s exchange students: 20). Ask NUS before planning more than 20.
- This limits the courses NUS enrols you in, not the courses you list

Sem 2

Primary picks

ST4234 Bayesian Statistics

Application form, Sem 2
1

Primary pick 1 · Sem 2 · 4 units · https://nusmods.com/courses/ST4234

Department, level	Statistics and Data Science, Science · Level 4000, Honours
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 2	✓ Sem 2 · Open to exchange students
NUS's notes	– GRO: “Higher level undergraduate courses (e.g. course code starting from 4000 & above) have very limited supply and are usually NOT available to exchange students. In order to increase the chances of securing enough courses, incoming exchange students should consider taking courses with course code starting from 1000 to 3000”.
2026/27 exam	Mon 26 Apr 2027, 9:00 am, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 3, preparation 3 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN (must have completed ST2132 at a grade of at least D)
Preclusion	None listed

COURSE DESCRIPTION (NUS, VIA NUSMODS)

Bayesian principles: Bayes' theorem, estimation, hypothesis testing, prior distributions, likelihood, predictive distributions. Bayesian computation: numerical approximation, posterior simulation and integration, Markov chain simulation, models and applications: hierarchical linear models, generalized linear models, multivariate models, mixture models, models for missing data, case studies. This course is targeted at students who are interested in Statistics and are able to meet the pre-requisites.

MA4251 Stochastic Processes II

Application form, Sem 2
2

Primary pick 2 · Sem 2 · 4 units · https://nusmods.com/courses/MA4251

Department, level	Mathematics, Science · Level 4000, Honours
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 2	✓ Sem 2 · Open to exchange students
NUS's notes	– GRO: “Higher level undergraduate courses (e.g. course code starting from 4000 & above) have very limited supply and are usually NOT available to exchange students. In order to increase the chances of securing enough courses, incoming exchange students should consider taking courses with course code starting from 1000 to 3000”.
2026/27 exam	Mon 26 Apr 2027, 5:00 pm, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 0, preparation 6 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN (must have completed 1 of MA3238/MA3238S/ST3236 at a grade of at least D)
Preclusion	If undertaking an Undergraduate Degree THEN (must not have completed ST4238 at a grade of at least D)

COURSE DESCRIPTION (NUS, VIA NUSMODS)

This course builds on ST3236 and introduces an array of stochastic models with biomedical and other real world applications. Topics include Poisson process, compound Poisson process, marked Poisson process, point process, epidemic models, continuous time Markov chain, birth and death processes, martingale. This course is targeted at students who are interested in Statistics and are able to meet the pre-requisites.

ST3247 Simulation

Application form, Sem 2
3

Primary pick 3 · Sem 2 · 4 units · https://nusmods.com/courses/ST3247

Department, level	Statistics and Data Science, Science · Level 1000–3000, undergraduate
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 2	✓ Sem 2 · Open to exchange students
2026/27 exam	Tue 27 Apr 2027, 1:00 pm, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 3, preparation 3 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN (must have completed 1 of MA2116/MA2116T/ST2131/ST2334 at a grade of at least D) AND (must have completed 1 of CS1101S at a grade of at least D, any Courses beginning with CS1010 at a grade of at least D)
Preclusion	None listed

COURSE DESCRIPTION (NUS, VIA NUSMODS)

The advent of fast and inexpensive computational power has facilitated the description of real phenomenon using realistic stochastic models which can be analysed using simulation studies. This course teaches students how to analyse a model by use of a simulation study and the topics include: pseudorandom number generation, generating discrete and continuous random variables, simulating discrete events,

statistical analysis of simulated data, variance reduction, Markov Chain Monte Carlo methods. It also covers topics in stochastic optimisation such as simulated annealing. This course is targeted at students who are interested in Statistics and are able to meet the prerequisites.

ST2137 Statistical Computing and Programming

Application form, Sem 2
4

Primary pick 4 · Sem 2 · 4 units · https://nusmods.com/courses/ST2137

Department, level	Statistics and Data Science, Science · Level 1000–3000, undergraduate
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 2	✓ Sem 2 · Open to exchange students
2026/27 exam	Wed 28 Apr 2027, 1:00 pm, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 3, preparation 3 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN must have completed 1 of MA2116/MA2116T/ST1131/ST2131/ST2334 at a grade of at least D
Preclusion	None listed

COURSE DESCRIPTION (NUS, VIA NUSMODS)

This course introduces students to the statistical computing and programming, with the main focus on R, Python, and SAS. Students will learn basic computing and programming concepts including scripting, variables, expressions, assignments, control structures, and data structures. On the statistical side, they will learn to load raw data, make numerical and graphical summaries of data, and conduct various estimation and testing procedures. Topics include descriptive statistics, statistical estimation, robust estimation, categorical data analysis, testing hypotheses, ANOVA, regression analysis, performing resampling methods and simulations. Some basic knowledge of R is assumed.

Backups

ST4248 Statistical Learning II

Application form, Sem 2
5

Backup 2 · Sem 2 · 4 units · https://nusmods.com/courses/ST4248

Department, level	Statistics and Data Science, Science · Level 4000, Honours
Counts	Counted, if NUS accepts you into it
Exchange status, Sem 2	✓ Sem 2 · Open to exchange students
NUS's notes	– GRO: “Higher level undergraduate courses (e.g. course code starting from 4000 & above) have very limited supply and are usually NOT available to exchange students. In order to increase the chances of securing enough courses, incoming exchange students should consider taking courses with course code starting from 1000 to 3000”.
2026/27 exam	Tue 4 May 2027, 9:00 am, 2 h (Singapore time)
Workload (NUSMods)	Lecture 3, tutorial 1, lab 0, project 3, preparation 3 hours a week (10 in all)
Estimated study time	About 10 hours a week (NUS's rate: 2.5 hours a week per unit). NUS states hours a week only; your university's own conversion decides credit.
Prerequisite	If undertaking an Undergraduate Degree THEN (must have completed all of ST3131/ST3248 at a grade of at least D)
Preclusion	If undertaking an Undergraduate Degree THEN (must not have completed YSC4216 at a grade of at least D)

COURSE DESCRIPTION (NUS, VIA NUSMODS)

Statistical Learning is a large collection of computer-based modelling and prediction tools with applications in diverse fields including business, medicine, astrophysics, and public policy. These two courses cover many popular approaches to a variety of statistical problems. There is heavy emphasis on the implementation of these methods on real-world datasets in the popular statistical software package R. Part II builds on the knowledge in Part I, introducing more tools as well as generalising and extending some tools covered in Part I using entirely different approaches. Topics include non-parametric smoothing methods, tree-based methods, support vector machines, neural networks and ensemble learning.

Sem 2 totals

- Sem 2: 16 units picked, if NUS accepts you into each
- About 40 hours a week at NUS's rate (2.5 hours a week per unit)
- NUS states hours a week only; your university's own conversion decides credit
- GRO: “Each semester normally includes 13 weeks of instruction and 2 weeks of examinations”
- To be admitted, NUS must accept you into at least 12 units in a semester (NUS's brochure; GRO: “three pre-registered courses (or 12 units)”)
- In CourseReg you must keep at least 12 units or three courses (GRO)
- NUS’s brochure says at most 23 units a semester, but NUS Global’s exchange page says 20 (NUS Business School’s exchange students: 20). Ask NUS before planning more than 20.
- This limits the courses NUS enrols you in, not the courses you list

NUS's application form order, for applicants

This order uses NUS's 2026/27 exchange list and exams. Applying for 2027/28? NUS publishes Sem 1's list in March or April, Sem 2's later (the 2026/27 list is dated 1 Sep 2026), and the timetable in mid-July: check each course there.

Sem 1 on NUS's form: 20 of 40 units

No.	Course	Units	On your list
1	**MA3210**	4	Pick 5
2	**ST3131**	4	Pick 6
3	**ST3236**	4	Pick 7
4	**ST3248**	4	Pick 8
5	**ST4253**	4	Backup 1

Sem 2 on NUS's form: 20 of 40 units

No.	Course	Units	On your list
1	**ST4234**	4	Pick 1
2	**MA4251**	4	Pick 2
3	**ST3247**	4	Pick 3
4	**ST2137**	4	Pick 4
5	**ST4248**	4	Backup 2

NUS has asked full-year students to choose Sem 2 courses later, by email before Sem 1 ends (NUS info sheet, 2018/19): check with NUS whether to list them now.

- NUS recommends listing as many relevant courses as you can, up to 40 units (GRO)
- NUS recommends ranking your compulsory courses among your top three choices, to increase your chances of securing them (GRO)
- NUS's form asks, for each course with a prerequisite, the home course that meets it (NUS's application guide)
- GRO: “If you did not secure any of the popular courses during the first round … please do not repeat your request for any of these courses in subsequent rounds”

ALREADY ADMITTED? NUS'S RULES FOR COURSEREG

- Keep at least 12 units or three courses a semester (GRO)
- Drop any course that clashes (GRO)
- On Business, Law and Economics courses: “If you are not successful in gaining placements into these popular courses at the point of offer, you are not able to add these courses during CourseReg” (GRO)
- Missing the drop deadlines “could lead to a Grade 'W' … or 'F' printed on your transcript” (GRO)
- The Registrar's Non-Graduating Office signs your Learning Agreement or Study Plan (GRO)
- “no particular course can be guaranteed by NUS” (GRO)
- A course not approved at application can be requested in “Submit Course Requests” or appealed as “Unable to secure course” (NUS's CourseReg FAQ)
- “Students are not allowed to read courses with any kind of timetable clashes” (NUS's CourseReg FAQ)
- You can't drop below the minimum workload (NUS's CourseReg FAQ)
- You may request “up to 23 Units in one course request”; above that, a Max Workload Waiver (NUS's CourseReg FAQ)
- Courses not on the exchange course list “are not available during application stage but may be available during Course registration” (the Registrar's course restrictions, rule E)
- “To check if the course is offered to Non-Graduating students, refer to the Vacancy Report” (NUS's CourseReg FAQ)
- Get your home university's approval before changing your study plan (NUS's brochure)
- This page can't see your offer. Your offer and CourseReg show which courses are yours.

- NUS posts each course's full syllabus on Canvas when the semester starts; the text here is NUS's course description (the Registrar's NG course list)
- “Transfer of units is entirely at the discretion of your home university” (GRO)
- NG course list updated as at 01 Sep 2026; NG course restrictions updated as at 31 Aug 2026
- Class times and corequisites aren't checked here
- For courses that have prerequisites, NUS asks for the syllabi of the courses you have completed or are taking (NUS's brochure)
- **Unofficial. Check with NUS before you register.** NUS Mod Finder, nusmodfinder.rcn.sh
